-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Remarks

1. The supplemental action is being made to corrected the claim rejection mailed 11/14/2007. The examiner inadvertently left out the claim numbers rejected in the 35 U.S.C. 102(e) rejection.

Allowable Subject Matter

2. The indicated allowability of claim 26 is withdrawn in view of the newly discovered reference(s) to Machek US 2004/0215320 A1. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 22-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Machek US 2004/0215320 A1.

5. Machek teaches a rolled graft, comprising a generally tubular graft flattened against itself and rolled onto itself into a cylindrical configuration [0035] wherein the graft includes a larger diameter main section and two smaller diameter section at an axial

end of the larger diameter section; and a temporary covering 72 surrounding and restraining the graft in the cylindrical configuration.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Machek in view of Wallace et al. 6254628.

8. Machek teaches the rolled graft of claim 22. It should be noted that Machek teaches the removal of a covering, but fails to teach a temporary covering comprising perforations along its length.

Art Unit: 3731

9. Wallace et al. teaches a covering with common perforations (94) for removal of the covering. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include the perforations of Wallace et al. on the cover of Machek to facilitate the removal of the cover.
10. Machek/Wallace teaches wherein the temporary covering is absorbable (col. 10, lines 28-29); and flexible member is embedded in the temporary covering (95).
